

Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 277840
Details of any extensions etc:	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments
Knowledge and understanding of the topic/ issues under consideration (25%)	Very Good	There is very good knowledge of your topic, but the discussion needs more theoretical underpinning. For future summative ensure that there is a balance between professional knowledge and theoretical underpinning.
Use of relevant sources (10%)	Satisfactory	There is a satisfactory amount of references used regarding the RPP summative. There does need to be more references and theoretical research applied to your content however, as this in turn allows more opportunity for citation and reflecting where research comes from. Your list of references needs to be in alphabetical order at all times for academic assignments.
Criticality (25%)	Satisfactory	There is some basic comparison of facts, and so statistics for example but generally the content interprets research. This means the content is very descriptive and the point of debate has not been embraced in the summative. There is a tilt towards the discussion being about practice as opposed to the required balance of practice and academic theory. Moving forward the capstone project you will need to embrace much wider theoretical discussion and research
Structure and Presentation (10%)	Very Good	The structure of the presentation is visually accessible and logical. You should have added more citation on the slides however. The content flows against the oral presentation and so one does mirror the other.
Presentation and Communication Skills (30%)	Satisfactory	The presentation is clear, but there could have been a little more pace in the content to make the discussion a little more dynamic and engaging. There could have also been more intonation in your voice. Moving forward consider how you would deliver a seminar in front of an audience or peers as this may help with delivery in future. A satisfactory outcome.
Overall		
Positives:		
<ul style="list-style-type: none"> Some very good outcomes With mostly satisfactory outcomes 		

- And satisfactory grade overall

Points for development:

- You need to develop your research
- In turn this will help you develop your critical academic content regarding summative
- Remember that debate and discussion need to occur in academic content, not just merely interpreting concepts/research
